GitHub: <https://github.com/GAMEstar911>

## **CAREER OBJECTIVE**

Motivated Software Engineering student seeking a three-month industrial attachment (May–July) with strong interest in Machine Learning and Artificial Intelligence.

## **EDUCATION**

Bachelor of Software Engineering – Kirinyaga University

2nd Year of Study | Expected Graduation: 2028

## **TECHNICAL SKILLS**

Programming: Python, C

Frameworks & Tech: Flask, REST APIs

Databases: MySQL, SQL Server

Tools: Git, Docker, Linux, VS Code

AI/ML: NumPy, Pandas, basic ML models

## **PROJECTS**

Gamestarmd – AI WhatsApp messaging app using Python, Flask, APIs, and Twilio

Weather Prediction App – Fetches real-time weather data using APIs

Machine Learning Model – Trains on datasets and predicts future data

Number System Converter – Academic project

## **TRAINING & SELF-LEARNING**

Python Programming, Machine Learning Basics, Beginner Ethical Hacking

## **LANGUAGES**

English, Kiswahili

## **REFEREE**

Cynthia Cherono – Colleague – 0796430448
